

Total Access to the Mexican Market

NOM and CRT Certification Strategy

20 years Certifying the Technology that moves Mexico.

Federal Telecommunications and Broadcasting Law (LFTR) - Art. 289

All products that can be connected to a telecommunications network or make use of the radio spectrum must be homologated in accordance with the applicable technical standards or provisions.

No Homologation, No Market

The entry of technological devices into Mexico requires absolute compliance with the Telecommunications Regulatory Commission (CRT).

Official Mexican Standards (NOMs)

20 Years

Of experience accompanying global manufacturers, importers, and distributors.

**From Management
to Compliance**

20+ Companies

Successful collaboration with national, international, and global brands.

Multidisciplinary Team

Experts in official Mexican standards for telecommunications, electronics, and technical provisions.

Local Compliance Architecture

A global device requires a local architecture

End-to-End Operational Machinery

Technical Consultancy

Precise diagnosis of applicable Technical Provisions (DT) for the device.

Laboratory Tests

Execution of tests through our signed agreements with Accredited Test Laboratories.

Homologation Procedures

Direct management before Certification Bodies and the Federal Telecommunications Institute (IFT/CRT).

Final Certificate

Delivery of the Homologation Certificate, ready for smooth commercialization.

Strategic Value Pillars

100%

Complete Support

Integral and transparent management. From laboratory tests to the final certificate.

100%

Agility in Timeframes

Absolute optimization in CRT homologation procedures to accelerate your 'Time to Market'.

100%

Regulatory Security

Impeccable regulatory compliance to import and operate your devices in Mexico without operational or legal risks.

Certifying the Technology that moves Mexico.
